

Application No.: 10/686,883  
Reply to Office Action of: March 15, 2010

**REMARKS**

By this amendment, claims 63-72, 75-82, 102, 106-111, and 113-118 are amended. The recitation objected to by the examiner has been removed from the claims, although applicant believes there is support for cellular communication in the parent application. Therefore, the applicant incorporates by reference the remarks made in the prior amendment and maintains that Vega, Walker et al., Klingman, and Foster et al. are not prior art to the claims in their present form. Favorable reconsideration of the rejected claims is respectfully requested. Applicant earnestly seeks resolving outstanding issues in order to expedite conclusion of this application.

Respectfully submitted,  
BERRY & ASSOCIATES P.C.
